

2018
YEAR OF THE
CALIBRACHOA
ngb.org

**2018 is the
Year of the Calibrachoa**

Few types of plants have seen the rise to stardom that Calibrachoa has. Over the last 20-30 years, Calibrachoa came from Brazil to Japan, Europe and America, then into your garden. When you consider that most of our other garden flowers have been around since the early 1700 or 1800's, Calibrachoa is still a bit of a "new kid on the block".
